

RADIANCE

CHANGE YOUR VIEW OF THE OUTDOORS.

FROM CLARITY DOMES

It's the next step in the evolution of shelter. A place to relax, converse and soak in the surroundings from a different perspective. For every climate, for every season, for every activity you enjoy outdoors, a Clarity Dome makes it that much more enjoyable.

THE ELEMENTS OF DESIGN.

Clarity Domes are built to withstand the elements themselves. Rain. Wind. Snow. Sleet. Hail. Damaging UV rays. The canopy is made of co-extruded polycarbonate; the same material used in aircraft windows and shatterproof eyeglasses. It's 250 times stronger than glass and can withstand repeated blows from a sledgehammer. The frame is made from aluminum and the fasteners are high quality stainless steel. High winds won't budge it. Heavy snow won't collapse it. Coastal salt air won't rust it. These high-tech materials and thoughtful construction mean that Clarity Domes are easy to maintain. Just wash with soap and water.

CUSTOMIZE FOR YOUR CLIMATE.

If it's not the weather chasing you indoors, it's the bugs or even the neighbors. Add privacy screens to block prying eyes. Or fully enclose your Clarity Dome with insect screens for a bug-free environment. With a Clarity Dome, the options are wide open.

All this without obstructing the views, interrupting the fresh air, or crowding your style.

RADIANCE

FROM CLARITY DOMES

The Radiance is the clear choice for a stylish outdoor shelter at a very affordable price.

ENDLESS USES

Perfect for spas, dining areas, patio furniture, a garden gazebo or poolside lounge.

ADVANCED MATERIALS

Co-extruded, UV block polycarbonate is the most durable of its kind. It will not warp, crack, break, or discolor when installed properly. The rugged aluminum frame is designed to withstand high winds and heavy snow. Stainless steel and cadmium-plated hardware won't corrode.

EASY TO SET UP AND MAINTAIN

Two people can set up the Radiance in about five hours. Wood decks and concrete patios provide a suitable foundation. Wash as required with soap and water.

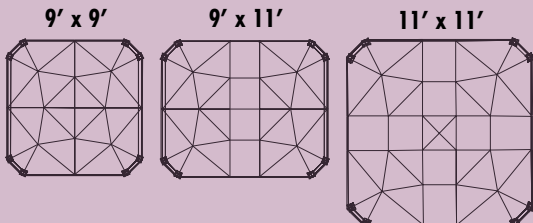

UV LIGHT PROTECTION

The canopy is virtually opaque to all wavelengths below 385 nanometers - reducing UV rays by over 98%. Your skin and your patio furniture will appreciate the protection.

CODE COMPLIANCE

Polycarbonate meets all requirements of BOCA, SBCCI, and ICBO for light transmitting materials and carries a Class CC-1 rating, the highest rating possible under all three major building codes. Building permits are not required in most areas.

CHOOSE FROM THREE SIZES

Distributed by:

CANOPY COLORS

Clear

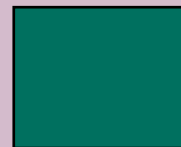

Bronze

FRAME COLORS

Snow White

Forest Green

Walnut Brown

OPTIONAL ACCESSORIES

Privacy Panels

Add privacy where you need it. Just snap in place, one side, two sides, or the entire dome. Three colors to choose from:

- Sumbrella® Linen
- Sumbrella® Persian Tweed
- Sumbrella® Silver Grey

Vinyl Mesh Screens

Add an impenetrable barrier against insects large or small. Floor to ceiling screens snap easily into place.
